

**Ecological corridor.** Adapted to landscape morphology and protecting natural elements. Creation of soft mobility paths using old railways, improving connection between urban centers

- - - - Ridge lines
- Water courses

**Ecological web** along infrastructures. Easier implementation/protection.

**New urban settlements (eOD):** new road junctions

**Urban settlements:** urban regeneration / compaction

**Urban settlements:** urban consolidation and planned extension

**Urban settlements:** urban consolidation

**East/West connection:** New infrastructures (roads/train) are an opportunity to improve dynamics and reactivate urban growth as an integrated system.

**Infrastructure network:** All the urban settlements are connected. Space dynamics will improve social and economic conditions.

**North/South connections:** External links to the corridor .
