Book Description:

The new book presents the latest research on ecology which is the study of the interrelationships between organisms and their environment, including the biotic and abiotic components. There are at least six kinds of ecology: ecosystem, physiological, behavioral, population, and community. Specific topics include: Acid Deposition, Acid Rain Revisited, Biodiversity, Biocomplexity, and Carbon Sequestration in Soils, Coral Reefs, Ecosystem Services, Environmental Justice, Fire Ecology, Floods, Global Climate Change, Hypoxia, and Invasion.

Table of Contents:

Preface

Chapter 1 - Earthworms as Bioengineers; pp. 1-84

(G. Tripathi, N. Kachhwaha, I.Dabi, Department of Zoology, J.N.V. University, J. Singh, Department of Entomology, Banaras Hindu University, India)

Chapter 2 - Soil Biota Associated Litter Decomposition and Nutrient Enrichment; pp. 85-121

(G. Tripathi, Ravindra Deora, Department of Zoology, J.N.V. University, Jodhpur, O.N. Singh, Regional Institute of Education, Bhubaneswar, India)

Chapter 3 - Escherichia coli as a Microbial Indicator of Fecal Contamination in Soils and Surface Waters: Roles of Environmental Biotic and Abiotic Factors in Modulating its Occurrence and Numbers; pp. 123-160

(Unc A., New Mexico State University, Plant and Environmental Science, V.S. Springthorpe, University of Ottawa, Centre for Research on Environmental Microbiology, CREM)

Chapter 4 - Molecular Tools in Microbial Ecology; pp. 161-183

(Solange Oliveira, Marta Laranjo, Ana Alexandre, Laboratório de Microbiologia do Solo-Instituto de Ciencias Agrárias Mediterranicas Departamento de Biologia, Universidade de Evora, Portugal)

Chapter 5 - Microorganisms Bioprospection: A New Tendency in Microbial Ecology; pp. 185-208

(Elcia Margareth Souza Brito, Instituto de Investigación en Biología Experimental, Universidad de Guanajuato, Leandro Helgueira Andrade, Departamento de Química Fundamental, Universidade de São Paulo, César Augusto Caretta, Departamento de Astronomia Universidad de Guanajuato, et al.)

Chapter 6 - The Evolutionary Ecology of Body Size with Special Reference to Allometry and Survivorship; pp. 209-229

(C. David Rollo, Department of Biology, McMaster University, Hamilton, Ontario, Canada)

Chapter 7 - Spontaneous Pattern Formation and Diversity in Spatially Structured Evolutionary Ecology; pp. 231-245

(Hiroki Syama, Department of Bioengineering, Binghamton University, State University of New York, Binghamton, NY, Les Kaufman, Department of Biology, Boston University, Yaneer Bar-Yam, New England Complex Systems Institute, Cambridge, USA)

Chapter 8 - How Influenza a Virus Ecology is Evolving in Wild Birds; pp. 247-263

(Mauro Delogu, Facoltà di Medicina Veterinaria, Dipartimento di Sanità Pubblica Veterinaria e Patologia Animale, Maria Alessandra De Marco, Istituto Nazionale per la Fauna Selvatica "A. Ghigi", Veterinary Laboratory, Fornacetta, Laura Campitelli, Isabella Donatelli, Viral Diseases and Inactivated Virus Vaccines and OMS, National Influenza Center, Rome Italy)

Chapter 9 - Two Levels of Research in Ecology; pp. 265-277

(Klaus G. Hering, Universidad Federal de Santa Catarina Brasil)
