## Table of Contents

[Cover](#)

[Contents](#)

[List of Illustrations](#)

[List of Tables](#)

[Preface](#)

**One: Introduction to the Handbook**

[1.1 Introduction](#)

[1.2 Overview of Chapters 2 to 8](#)

[1.3 Maximum Likelihood with CaptureRecapture Methods](#)

[1.4 Model Selection Procedures](#)

[1.5 Notation](#)

**Two: Classical Closed-population CaptureRecapture Models**

[2.1 Introduction](#)

[2.2 Structure of CaptureRecapture Experiments and Data](#)

[2.3 Early Models and Estimators](#)

[2.4 Limitations of Early Models and the Motivation for More General Models](#)

[2.5 Chapter Summary](#)

**Three: Classical Open-population CaptureRecapture Models**

[3.1 Introduction](#)

[3.2 The Original Jolly-Seber Model](#)

[3.3 The Jolly-Seber Likelihood Components](#)

[3.4 Restrictions and Generalizations of the Jolly-Seber Model](#)

[3.5 Age-dependent Models](#)

[3.6 Goodness-of-Fit and Model Selection Issues](#)

[3.7 Examples](#)

[3.9 Chapter Summary](#)

**Four: Modern Closed-population CaptureRecapture Models**

[4.2 Discrete-time Models with Unequal Catchabilities](#)

[4.3 Continuous-time Models](#)

[4.4 Computing Considerations](#)

---

#### 4.5 Chapter Summary

---

### **Five: Modern Open-population CaptureRecapture Models**

---

#### 5.1 Introduction

---

#### 5.2 Conditional Single-age Models

---

#### 5.3 Conditional Multiple-age Models

---

#### 5.4 Reverse-time Models

---

#### 5.5 Unconditional Models

---

#### 5.6 The Robust Design

---

#### 5.7 Discussion

---

#### 5.8 Chapter Summary

---

### **Six: Tag-recovery Models**

---

#### 6.1 Introduction

---

#### 6.3 Interpretation of the Tag-recovery Rate Parameter

---

#### 6.5 Instantaneous Rate Models for Estimating Harvest and Natural Mortality

---

#### 6.6 Diagnostics and Tests of Assumptions

---

#### 6.7 Preventing and Dealing with Failures of Assumptions

---

#### 6.8 Chapter Summary

---

### **Seven: Joint Modeling of Tag-recovery and Live-resighting Data**

---

#### 7.1 Introduction

---

#### 7.2 Data Structure

---

#### 7.3 Simple Models

---

#### 7.4 More General Models

---

#### 7.5 Model Fitting and Assessment

---

#### 7.7 Computing Considerations

---

#### 7.8 Chapter Summary

---

### **Eight: Multistate Models**

---

#### 8.1 Introduction

---

#### 8.2 The Arnason-Schwarz Model

---

#### 8.3 The Jolly-Seber Approach

---

#### 8.4 Multisample Stratified Closed Populations

---

#### 8.5 Multisample Stratified Open Populations

---

#### 8.6 Chapter Summary

---

### **Nine: Examples**

---

#### 9.1 Introduction

---

#### 9.2 Open-population Analyses of Data on the European Dipper

---

#### 9.3 The Huggins Closed-population Model Applied to the European Dipper Data

---

#### 9.4 Assessing Goodness-of-Fit

---

#### 9.5 Horvitz-Thompson Open-population Size Estimates

---

#### 9.6 A Multistate (Multistrata) Model

---

#### 9.7 Polar Bears in the Southern Beaufort Sea

---

#### 9.8 Dead Recoveries of Mallard Ducks

---

#### 9.9 Chapter Summary

---

### **Ten: CaptureRecapture Methods in Practice**

---

#### 10.2 Closed-population Models

---

#### 10.3 Open-population Models

---

#### 10.4 Tag-recovery Models

---

#### 10.5 Other Models

---

#### 10.6 Model Selection

---

#### 10.7 Known Ages

---

**Appendix**

---

A.1 Capability Matrix for Common CaptureRecapture Software Packages

---

A.2 General and Contact Information for Common CaptureRecapture Software Packages Listed in Table A.1
